REQUIREMENTS DOCUMENT

Infolks Group Careers Website & HR Recruitment Portal

Finalised requirements | 2 November 2026

1. Purpose and Scope

Infolks Group is rebuilding its careers page together with a new HR recruitment portal. The solution has two connected parts:

- Careers website (public): where candidates find jobs, sign in, build a profile and apply.
- HR recruitment portal (private, separate application): where HR creates and publishes jobs and manages candidates, applications and interviews.

Jobs are created only in the HR portal and appear automatically on the careers website. Candidate profiles and applications made on the website appear automatically in the HR portal. The careers website replaces the existing infolksgroup.com/career page and covers the career sections only. The rest of the company website is out of scope.

2. Company Structure and Naming

Name	Meaning
Infolks Group	The parent company. The careers page, the HR department and the recruitment portal belong to Infolks Group.
Infolks	An entity under the group, separate from Infolks Group. It must never be shown or tagged as the parent company.
Webfolks	Entity under the group.
Dataways	Entity under the group.
Medrays	Entity under the group.

- The entities have their own websites, themes and patterns, but no career pages yet. All jobs are published on the single Infolks Group careers page.
- Each job carries an entity tag so candidates can recognise the entity.
- Each job card and job detail page uses the theme, colours, logo and motto of its entity. The overall page layout stays the same.

3. Users

User	Description
Candidate	Anyone looking for a job. Signs in with Google, keeps one profile and applies to jobs.
Talent community member	A person who has joined the talent community, either by signing in or through the short sign-up form.
HR user	A member of the Infolks Group HR department. Has an individual account with a role and permissions (Admin and HR). Sees all four entities.

There are no hiring managers or entity-level users.

4. How It Works

Step	Who	What happens
1	HR	Creates a job in the portal, selects the entity, level and details, and publishes it.
2	Candidate	Finds the job using search and filters and reads the details.
3	Candidate	Signs in with Google, completes the profile and submits the application form.
4	System	Sends a confirmation email stating the role and company, and adds the candidate to the talent community.
5	HR	Reviews the application, shortlists the candidate and schedules interviews.
6	Candidate	Signs in to see the status of each application and receives job alerts by email.

5. Careers Website Requirements

5.1 Landing page

ID	Requirement
LP-01	One page for the whole group listing the careers content of all four entities. It replaces the current career page and matches the redesigned Infolks Group website.
LP-02	Section 1: the motto or key words matching the website theme, with a "Search for role" tab that leads to the job search page.
LP-03	Section 2: "Choose your entity" tabs for Infolks, Webfolks, Dataways and Medrays.
LP-04	Section 3: the interview procedure steps.
LP-05	Section 4: why join us, covering culture and specialities.
LP-06	Section 5: company numbers such as employees, years in business and clients served.
LP-07	Section 6: a talent community sign-up with the shortest possible form (name, email and phone).
LP-08	Section 7: videos, employee experiences and extracurricular activities.
LP-09	A Job Search link that opens the separate job search page.
LP-10	The landing page content is fixed. It is not editable from the HR portal.
LP-11	The page works on desktop and mobile.

5.2 Job search page

ID	Requirement
JS-01	A separate page that lists all open jobs from the four entities.
JS-02	One search box that searches by role, skill or entity name.
JS-03	Filter by entity: Infolks, Webfolks, Dataways, Medrays.
JS-04	Filter by team or department. The list is maintained in the HR portal.
JS-05	Filter by level: Internship or All level.
JS-06	Filter by location.
JS-07	A skills box where the candidate types or selects skills and the page shows the roles that match.
JS-08	Each job card shows title, entity tag, team, level, location and posting date, and uses the entity theme.
JS-09	A clear message is shown when no jobs match.

ID	Requirement
JS-10	Only published jobs that are still open are listed.

5.3 Job detail page

ID	Requirement
JD-01	Every job uses one template.
JD-02	The page shows title, entity tag, team, level, location and posting date.
JD-03	The page shows the last date to apply.
JD-04	The page shows the role summary, qualification required, skills required and experience required.
JD-05	The page shows why join us (entity-specific where needed) and the interview procedure steps.
JD-06	An Apply button takes the candidate to sign-in and then to the application form.
JD-07	The page uses the theme, logo and motto of the job's entity.

5.4 Sign-in, profile and My Applications

ID	Requirement
PR-01	Google sign-in is the only sign-in method.
PR-02	On first sign-in a candidate account is created and the candidate is asked to complete the profile.
PR-03	The profile holds the same details as the application form and can be edited later.
PR-04	Profiles are kept permanently. Candidates cannot delete their profile or applications.
PR-05	The profile on the website is the same profile HR sees in the portal.
PR-06	Signing in adds the candidate to the talent community.
PR-07	A "My Applications" area lists every job the candidate applied to, with entity, role and status.
PR-08	When a signed-in candidate applies to a new job, the application form is pre-filled from the profile and the candidate can check and edit the details and resume before submitting.

5.5 Application form

Field	Type	Required	Notes
Name	Text	Yes	Full name.
Email address	Email	Yes	Filled from the Google account.
Phone number	Phone	Yes	Include country code.
Location	Text	Yes	City, Country.
Gender	Select	Yes	Male, Female or Other.
Years of experience	Number	Yes	Example: 5.
Current CTC	Number	Yes	Current annual salary.
Expected CTC	Number	Yes	Expected annual salary.
Reference ID	Text	No	Infolks Group employee ID of the referrer. Not checked against any list. HR verifies it manually.

Field	Type	Required	Notes
Resume	File	Yes	PDF or DOCX only, maximum 5 MB.
LinkedIn URL	URL	No	Profile link.
Portfolio URL	URL	No	Personal portfolio or work link.

ID	Requirement
AF-01	The form follows the design supplied by HR (Job Application image, slide 3).
AF-02	Clear messages are shown for missing required fields, invalid email, invalid phone number, wrong file type and links that are not valid URLs.
AF-03	After submitting, the candidate sees a confirmation message and receives a confirmation email.

5.6 Who can apply

ID	Requirement
AR-01	A candidate can apply to a job only once.
AR-02	A candidate can apply again to a similar role once a new opening for that role is created.
AR-03	If a candidate is rejected at any stage after shortlisting, they cannot apply for the same role for 6 months. They can apply for other roles.
AR-04	A blacklisted candidate's applications are not considered for 6 months. This applies across all entities.
AR-05	When a candidate is blocked, the website shows a clear message. The 6-month block lifts automatically, and HR can override it.
AR-06	Applications are not accepted after the last date to apply.

5.7 Talent community

ID	Requirement
TC-01	Every signed-in candidate is part of the talent community.
TC-02	Anyone can also join through the short sign-up form on the landing page without signing in. The form takes a basic profile: name, email and phone.
TC-03	Members receive emails about new openings and company updates.
TC-04	Every talent community email has an unsubscribe link.
TC-05	Unsubscribing stops alerts and updates. Application confirmation emails still go out.

6. HR Recruitment Portal Requirements

6.1 Access

ID	Requirement
HA-01	The portal is a separate application from the careers website.
HA-02	HR users sign in with their own account. Roles are Admin and HR, with permissions assigned per role.
HA-03	Admin manages HR users, roles, teams and the skills list. HR works on jobs, candidates, applications and interviews.

ID	Requirement
HA-04	All HR users see jobs and candidates of all four entities and can narrow down using the entity tag and filters.

6.2 Sections

The portal has five sections: Dashboard, Jobs, Candidates, Applications and Interviews. Every section has search and filters so HR can sort by job role.

Section	Requirements
Dashboard	Shows open jobs, new applications and interviews today, so HR sees what needs action as soon as they log in.
Jobs	Create, edit, publish, unpublish and close a job. HR manages the last date to apply manually and can extend it. The website updates automatically. Job fields are listed in section 6.3.
Candidates	Full profile with all application form details, resume, links, application history, and the date and source of each application. HR can add notes and remarks to record feedback, mark candidates with colour tags (contacted or not contacted) and set a blacklist marker. Filters include gender, entity, role and blacklisted.
Applications	Lists all applications with filters. Statuses: Applied, Under Review, Shortlisted and Rejected. A Shortlisted application moves the candidate to Interviews.
Interviews	Interview rounds and their status updates. HR schedules each round with date, time, mode and interviewer, and Google Calendar is used for the schedule. Round status: Scheduled, Completed, Passed or Not Selected.

6.3 Job fields

Field	Notes
Job title	Text.
Entity	Infolks, Webfolks, Dataways or Medrays. Shown as the entity tag on the website.
Team	Selected from a list maintained in the portal.
Level	Internship or All level.
Location	Text. Used as a filter.
Skills	One or more skills, used by the website skills search.
Summary	Role summary.
Qualification	Required qualification.
Experience	Required experience.
Why join us	Text. Entity-specific where needed.
Last date to apply	Managed manually by HR. Visible to candidates.
Status	Draft, Published or Closed.
Posted date	Set automatically on publishing.

6.4 Candidates and interviews

ID	Requirement
CI-01	Each candidate has one profile. Each application is shown separately with its own entity, role, level, source and status.
CI-02	Every application carries the tags: entity, role, level, source and referred. Source is career website, job alert or referral. Referred is Yes when a Reference ID is entered.
CI-03	HR can add notes and remarks to a candidate profile, and use colour tags to separate contacted from non-contacted candidates.
CI-04	HR can set a black marker on a candidate. Blacklisted candidates can be filtered and sorted. Blacklisting applies across all entities for 6 months.
CI-05	A candidate who passes all interview rounds is marked Selected. Nothing more is done in the portal, because accepted candidates are moved to the HRMS manually. There is no Joined status.
CI-06	A candidate who does not pass any interview round is marked Not Selected in the Interviews list.
CI-07	Counts of results are shown in every list and filter, so HR can see how many candidates are in each set.
CI-08	HR can export candidate data to Excel.
CI-09	HR can send job alerts and company updates to the talent community, with the unsubscribe link included.

7. Emails

Email	Sent to	When
Application confirmation	Candidate	Immediately after applying. States the role and the entity (company).
Job alerts and company updates	Talent community	When HR sends them. Includes an unsubscribe link.

No emails are sent when a status changes. Interview invitations, offers and rejections are not sent from the system.

8. Data to Be Stored

Record	Main information
Candidate account	Google account email, name, profile fields from the application form, resume, LinkedIn, portfolio, gender, talent community subscription status, blacklist marker, colour tag, created date.
Application	Candidate, job, entity, applied date, source, Reference ID, status and interview rounds with dates.
Job	All fields in section 6.3, plus created by, created date and published date.
Candidate notes	HR notes and remarks on the candidate, with author and date.
Talent community member	Name, email, phone and subscription status.
Email log	Which email was sent to whom, when and for which job or update.
HR user	Name, email, login details, role and last login.

Candidate profiles and applications are kept permanently.

9. General Requirements

- The careers website works on desktop and mobile.
- The website matches the redesigned Infolks Group website, with entity-wise themes on job cards and job detail pages.
- Entity names are used consistently across the website and portal, as set out in section 2.
- Candidate data is private and is visible only to HR users with the right permissions.
- Resumes are limited to PDF or DOCX, with a maximum size of 5 MB.
